

User case:

User case 1: create new user

- 1) set your username and password
- 2) log into your account
- 3) there are already some demo footprints and wishlists

User case 2: log into your account

- 1) add new footprint by selecting locations, adding comments and details. Also, you can take a picture of your footprint.
- 2) add your wishlists

User case 3: the popularity of footprints

- 1) every time you add a footprint based on a location, the location mark based on google map api will show the popularity of this location by different colors.
